The UNI Student Satisfaction Survey	45

Introduction

This report presents a summary of the University of Northern Iowa (UNI) Student Satisfaction Survey. The purpose of this report is to provide summary information on the perceptions of UNI students regarding multiple facets of student life at UNI, including the academic curriculum, social interactions, university computer services, and library facilities and services. This survey was given to all UNI students participating in advanced registration for the Spring 2003 semester (November 14, 2002 – December 6, 2002). A total of 9,868 students responded to the survey items. Figure 1 presents the composition of respondents by college.

Both the UNI Computer and Library Satisfaction Survey and the UNI Student Climate Survey have been administered to UNI students for a number of years. Many of the questions in these previous survey instruments, albeit comprehensive and thorough, were somewhat vague and slightly repetitive. The questions, which had been designed several years ago, did not assess the ever changing environment of the student experience at UNI. In an attempt to obtain a more accurate and up to date picture of the perceptions and concerns of UNI students, the two surveys were consolidated into one survey. The combined survey incorporated several key elements from the previous two surveys, in addition to adding several new questions designed to better evaluate

UNI students' opinions. Since student climate at UNI is directly influenced by the computer and library facilities available at the university, it was only natural that the Computer and Library Satisfaction Survey and the Student Climate Survey should be combined into one cumulative survey.

This combined survey was the result of the collaboration of several offices on campus. The initial survey questions from both instruments were analyzed and questions that addressed similar constructs were condensed into one single question. The remaining items from both surveys were then compiled into one survey. Questions chosen to be included in the integrated survey focused on issues that related directly to improving the student experience at UNI. Campus climate is an issue that strongly affects the student's opportunity for success at the university. The goal of this survey is to present a list of issues that the student body feels should be addressed in order to improve the climate on the UNI campus.

Method

Students were presented with the UNI Student Satisfaction Survey questions during the Spring 2003 online registration period between November 14, 2002 and December 6, 2002. Respondents were asked to answer a set of two paired questions randomly selected from a list of 18 pairs. Each question was answered by approximately 500 students, except for one item. This question, which asked students about personal computer ownership, was matched with eight questions (6.1, 7.1, 8.1, 9.1, 13.1, 14.1, 15.1 and 16.1). The item on personal computer ownership was answered by 4,260 students.

Most questions on the Student Satisfaction Survey focused on aspects of university climate directly related to student life and learning. Items ranged from "I have had a high quality mentoring relationship with a UNI faculty or staff member" to "the library usually has the scholarly journals (periodicals) I need for my studies" to "the UNI computer network is generally accessible after 5 pm from off campus." Several questions were included that focused on childcare needs of UNI students. These

questions and responses were removed from the original data set and were not used in the analysis of this survey. See Appendix A for a complete list of the survey questions.

All students participating in electronic registration for the Spring 2003 semester were randomly presented with two paired questions prior to being advanced to the registration screen. Respondents were asked to indicate the extent to which they agreed or disagreed to the survey statements on a Likert scale ranging from 1 (strongly disagree) to 5 (strongly agree). Some of the items required the student to indicate a "yes" or "no" response. All survey responses were recorded and compiled into a master file. The survey responses were sent from Information Technology Services to the Office of Information Management and Analysis and converted to a data file. The data were then analyzed to show patterns of response.

Table 1 presents demographic information for respondents to the UNI Student Satisfaction Survey by college. For the purposes of this study, demographic information consists of age, sex, race/ethnicity, marital status, grade level, and residency classification. We were unable to obtain demographic information for some respondents. This missing data is reflected in decreased total numbers for each category. Throughout the report most percentages were rounded to the nearest one tenth of one percent. Therefore, due to this rounding, the values of some of the tables may not equal exactly 100%.

Results

A table and figures containing mean scores for each survey item are presented in the pages to follow. Mean scores are displayed with the "no opinion" and without the "no opinion" response included. Summary tables and charts of responses to the survey questions showing the number and the percent responding to each question broken

down by college are also presented. Data for some respondents was unavailable; therefore, some percentages may reflect this missing data. The following list presents some of the key observations of the survey. Certain patterns of response may indicate a need for future examination of these relationships in the university environment. Please note that agreement is presented in terms of individuals who responded either "agree" or "strongly agree" to the survey items.

- Students are generally satisfied with their experiences with computers at UNI.
 - Approximately fifty percent (53.0%) of students indicated that the training they have received at UNI on the use of computers has generally met their educational needs.
 - Almost sixty percent (59.5%) of the respondents indicated that they have been exposed to the computer tools necessary to use and learn about computers in their chosen profession or field following graduation.
 - Two-thirds of students (67.5%) indicated that computers had been a significant part of their coursework at UNI.
- Students appear to be slightly ambivalent in regard to mentoring and advising opportunities at UNI.
 - Less than half of the respondents (41.6%) indicated that they had a high quality mentoring relationship with a UNI faculty or staff member.
 - 52.2% of respondents said that they had received high quality advising at UNI.
 - Nearly fifty percent of students (49.1%) indicated that they have
 collaborated with faculty or staff on academic or extracurricular activities.
- Students perceive that UNI is an entity that fosters the development of multicultural ideas and values in the classroom.
 - 53.8% of students indicated that their academic major includes information on multiple cultures and points of view.

- Approximately 55 percent (54.2%) of respondents perceived that UNI
 effectively prepared them to be contributing members of a multicultural /
 multinational world.
- 55.7% of students said that faculty encourage the expression of diverse points of view in the classroom.
- Students feel that UNI promotes an environment that is accepting of diversity and different ideas and values.
 - 57.5% of students perceive that UNI values all of its members regardless of race, ethnicity, sex, age, sexual orientation, religious beliefs, physical disability, or socioeconomic status.
 - Almost sixty percent of students (58.5%) indicated that UNI provides a
 welcoming and responsive environment for members of the UNI
 community who have unique needs that may affect their opportunity for
 success.
 - 62.2% of respondents said that they had experienced positive social interactions with students who have different backgrounds or beliefs than their own.
 - Less than twenty percent (17.7%) of students indicated that they had experienced a prejudicial remark or behavior on campus tied to their race, ethnicity, sex, age, sexual orientation, religious beliefs, physical disability, or socioeconomic status.
- Students feel that they are given adequate support in the use of the library and its resources, however many fail to take advantage of the opportunities that exist there.
 - Nearly two-thirds of the respondents (62.0%) had no opinion on the timeliness of the library's inter-library loan service, while only 27% said they agreed that the service provided them with their requests within a two week time period.

- Almost forty percent (39.6%) of students agree that Rod Library instruction sessions (tours, classes, workshops) are helpful in their academic work; however, most (46.7%) were neutral in response to this question.
- Over half of the respondents (55.8%) indicated that the library usually has the scholarly journals and other materials they need for their studies.
